

System 1: Gecko

Screenshots

Note

Please note that the basic screen layout for System 1 (Gecko) requires a four-chart layout (eg 5, 15, 60 and 240min). I am using a 27-inch widescreen monitor and have them all layed out on this one screen; alternatively a 24-inch or at smallest a 17-inch can be used as well).

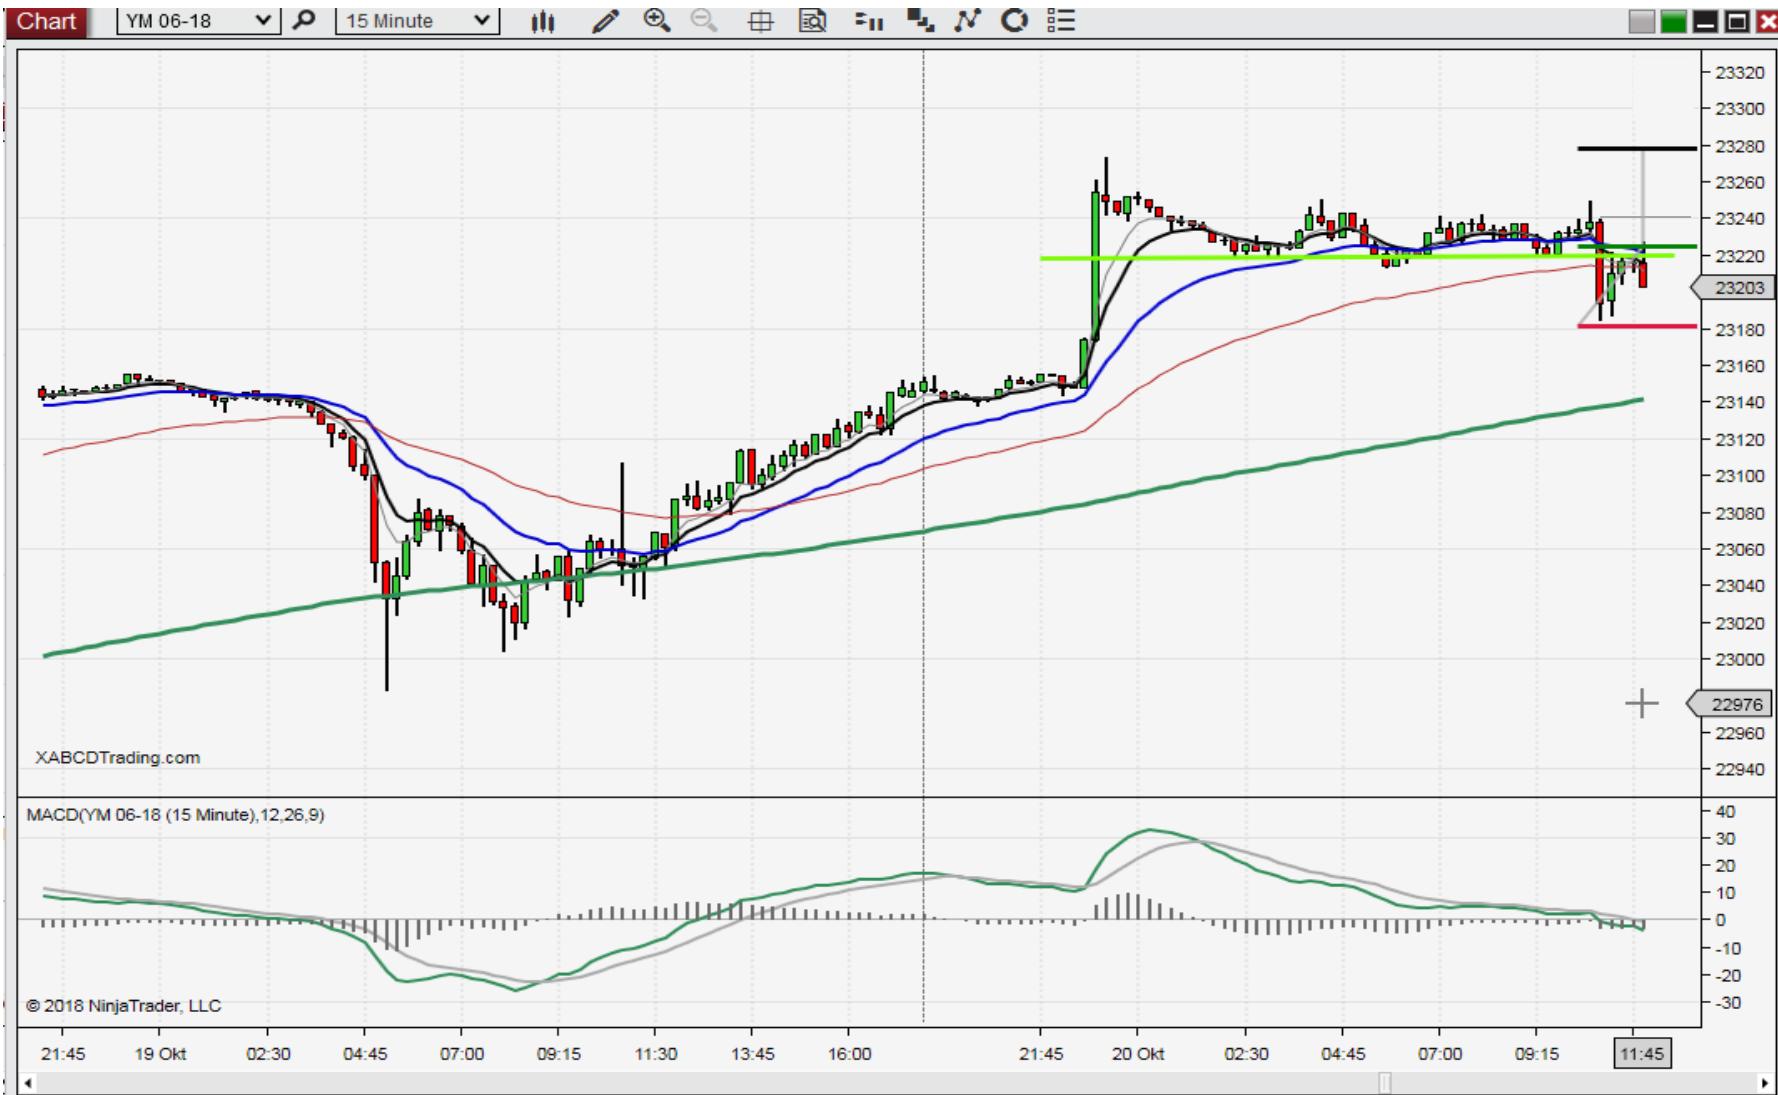

On all charts the following Moving Averages are plotted: 8EMA (black), 21EMA (blue), 50EMA (red) and 200SMA (green); in addition on the High Frame (HF) the 5EMA (grey) is plotted. EMA stands for Exponential Moving Average, whereas SMA is the Simple Moving Average.

The following trade screenshot examples are specifically selected and ordered in the way to provide you the best learning experience. As you go from trade to trade, you will be shown how the system/pattern works in relation to the different timeframes. After reviewing the rule-set again you might want to analyze these screenshots again. Initially you might be confused as it is not easy to grasp all aspects of the rule-set at once especially if several timeframes are involved. You will fully understand the system once the Trading simulation has been made.

Note: Over the years I have eliminated more & more information on my charts. Less information actually allows me to focus more on reading the price action and inner dynamics of the charts. Nowadays, I am only using the 4 Moving Averages (see above) as they have proven to work very well with the systems presented. I do not use the MACD plotted at the bottom of each chart for these systems.

Gecko Pattern – the pattern represents a pause (refresher) within overall trend (Entry: Long YM, 15min)

Gecko1

Gecko Setup – clear support from Higher timeframe EMAs (21/MF and 5/HF)

(Entry: Long YM, 15min)

Gecko1

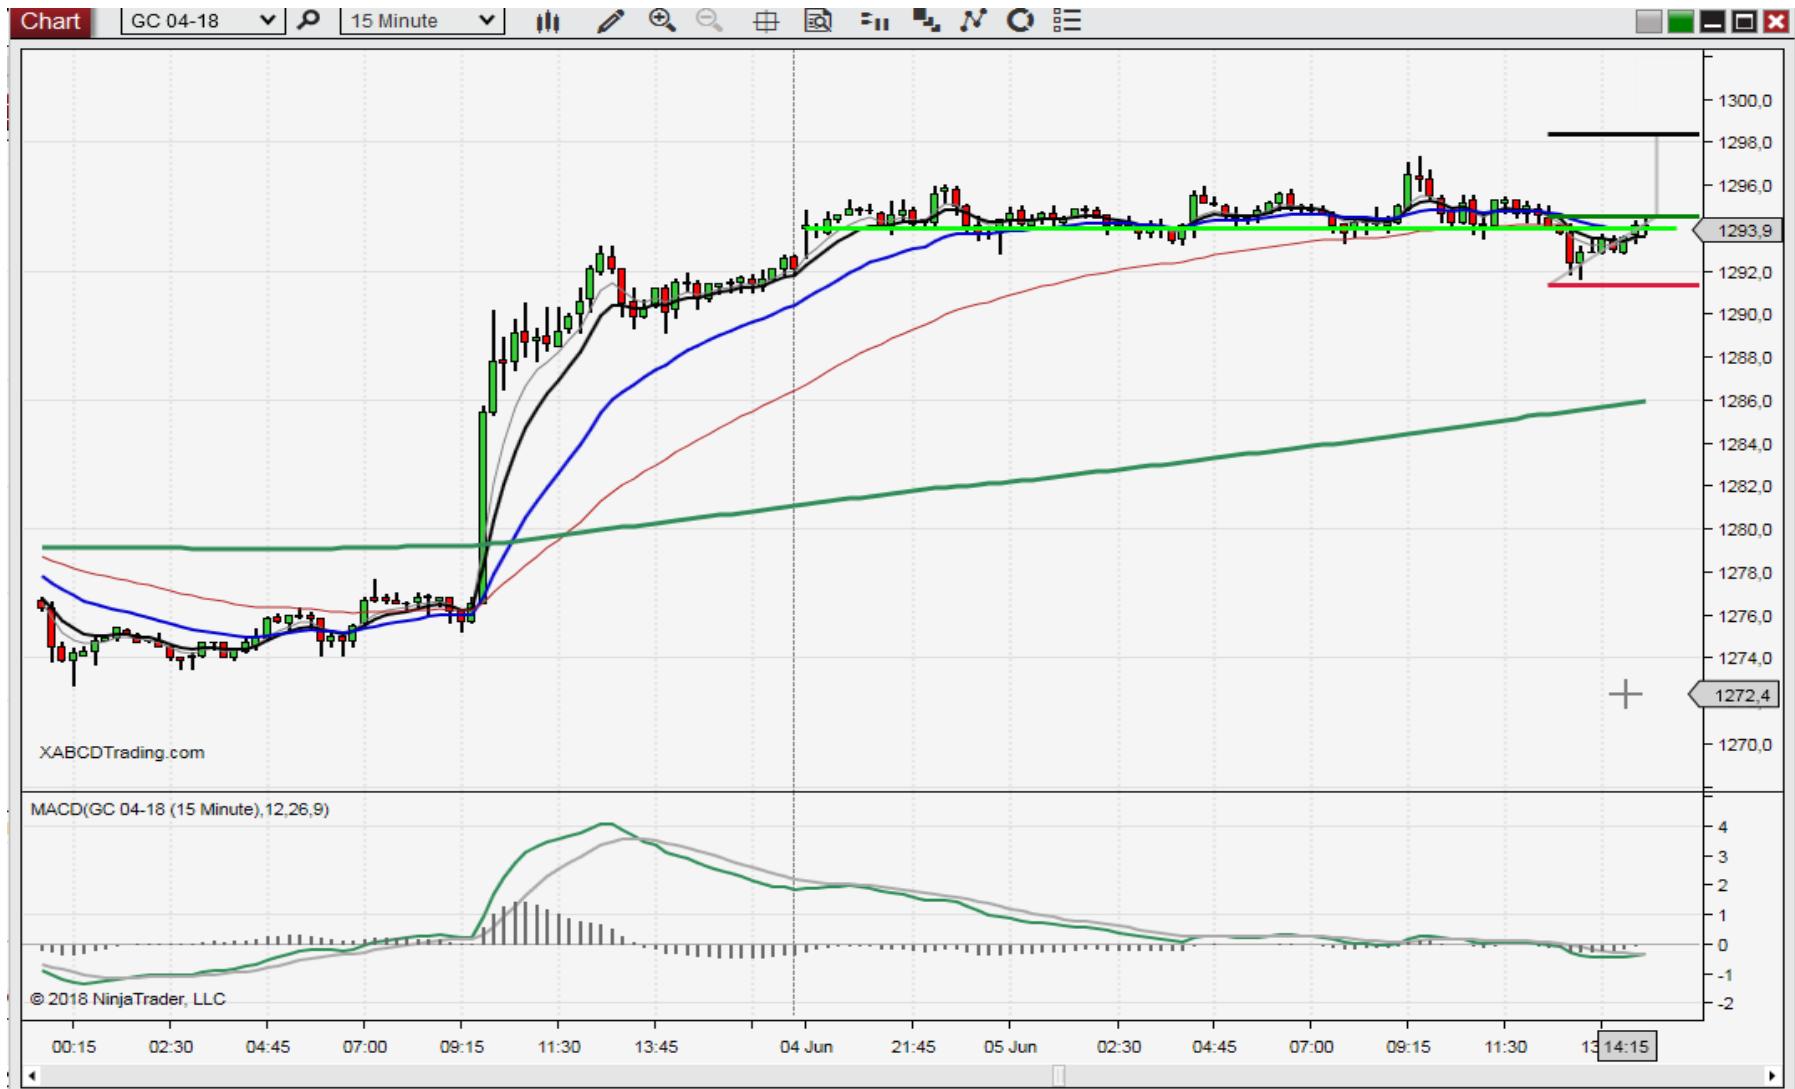

Gecko Development – follow-through making new highs; pullback to EMA21 MF (Entry: Long YM, 15min)

Gecko1

Gecko Pattern – clear & strong FTB; good compression at consolidation end (Entry: Long GC, 15min)

Gecko2

Gecko Setup – getting long with a low-risk idea to trade the 240min chart (Entry: Long GC, 15min)

Gecko2

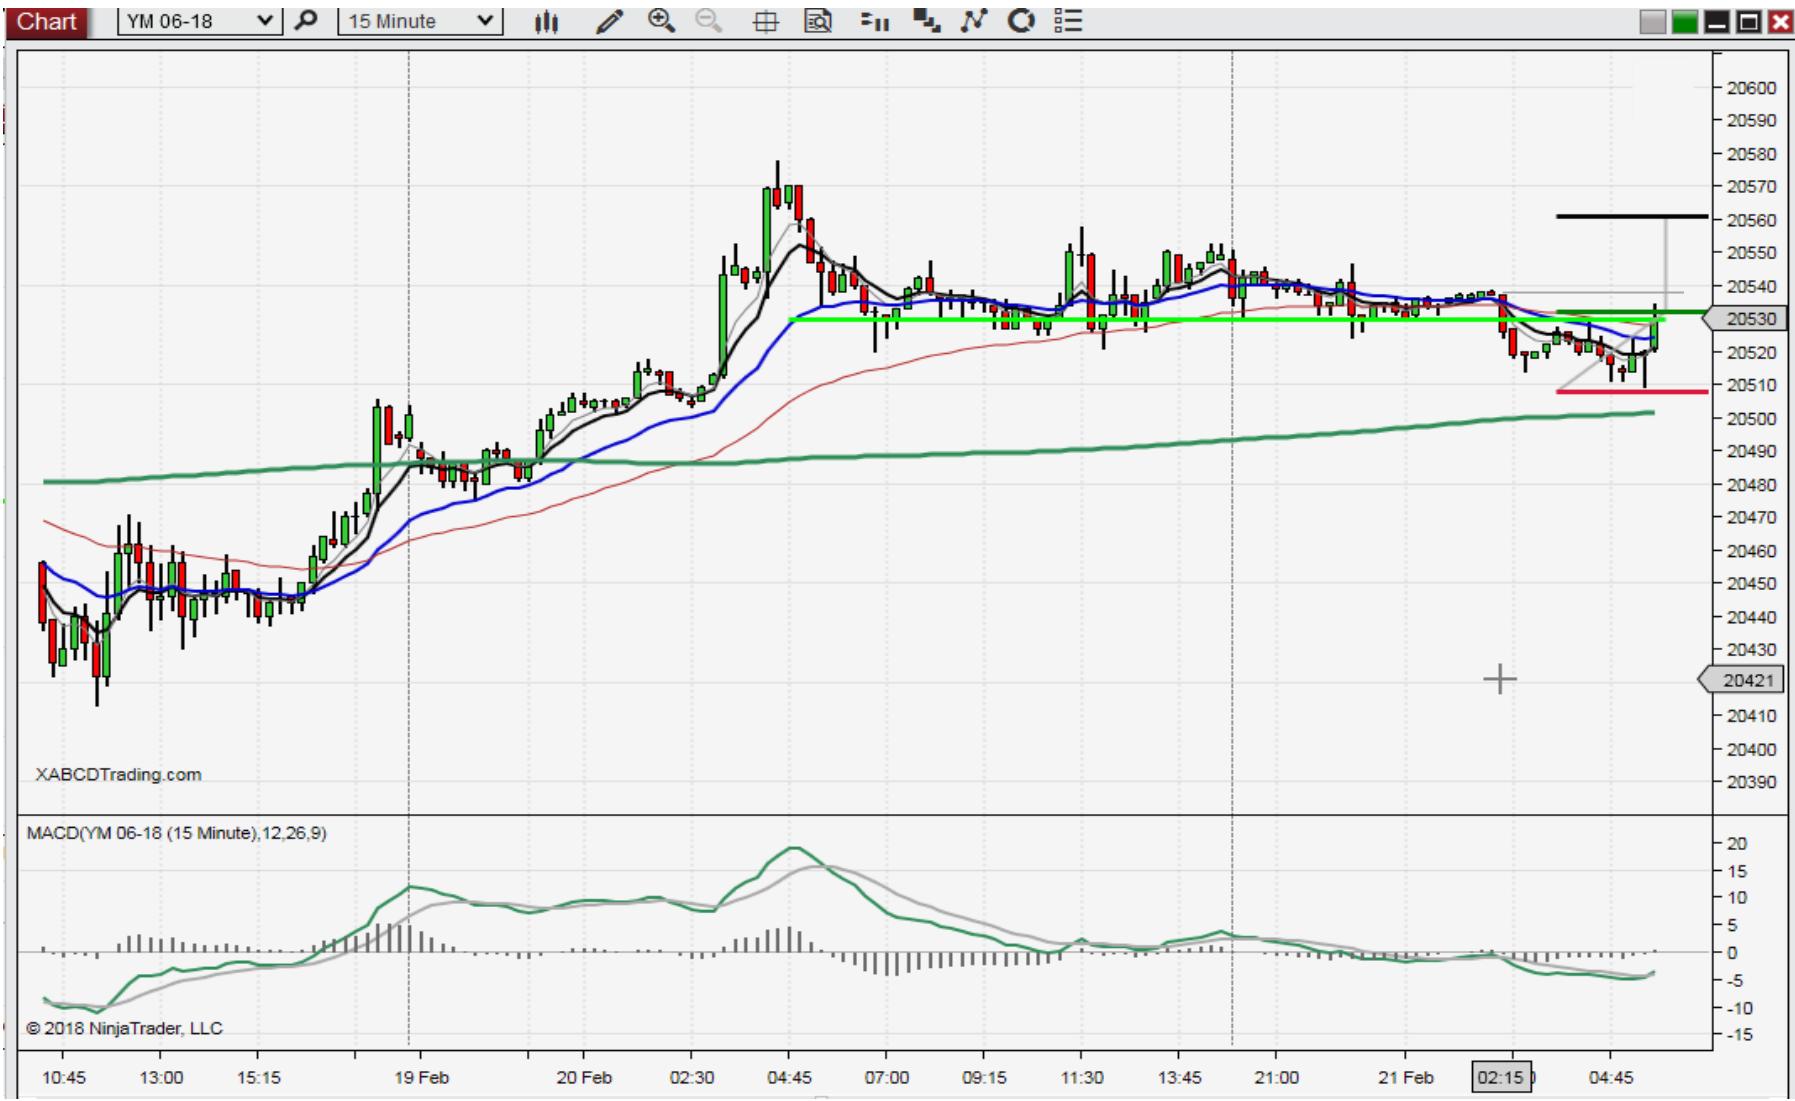

Gecko Development – trend continuation with Higher Highs and Higher Lows (Entry: Long GC, 15min)

Gecko2

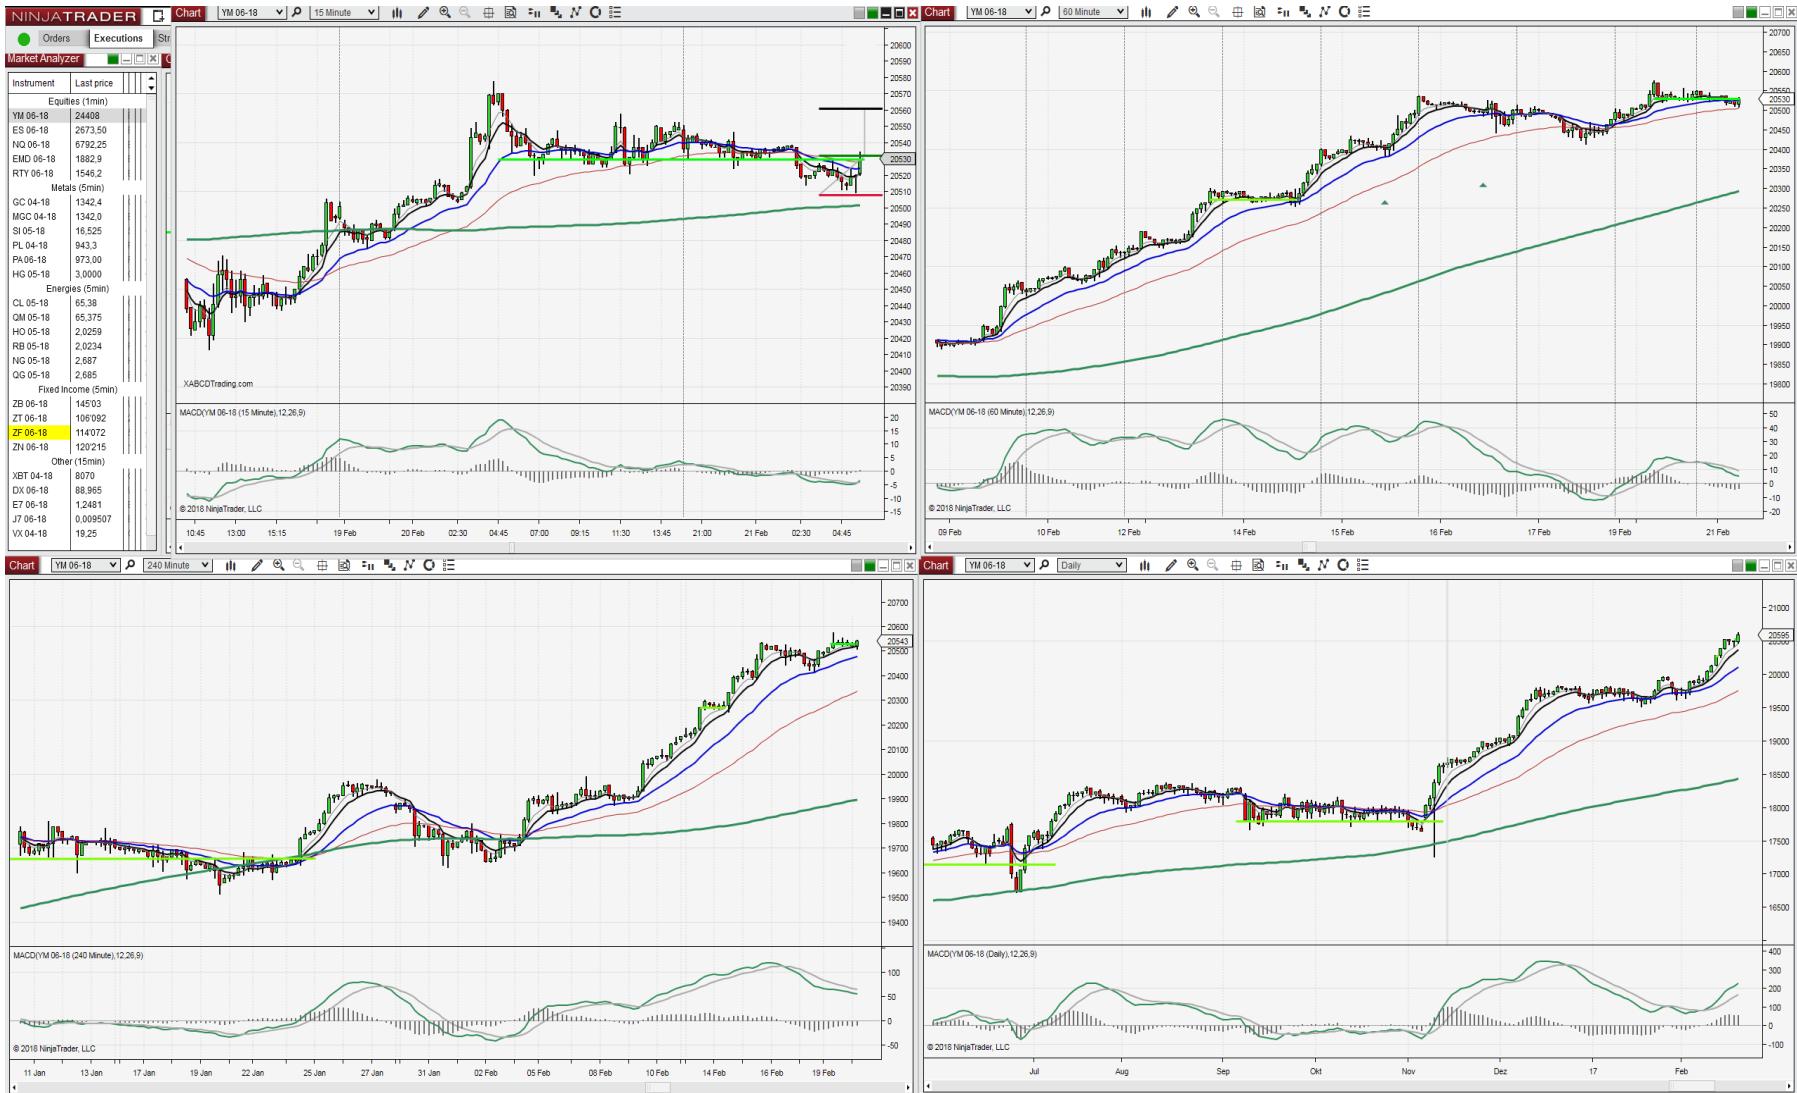

Gecko Pattern – many touches, good compression and multiple stop-run levels (Entry: Long YM, 15min)

Gecko3

Gecko Setup – well established higher timeframe trends with test of HT EMAs (Entry: Long YM, 15min)

Gecko3

Gecko Development – stop-run move taking out all stops of the pattern (Entry: Long YM, 15min)

Gecko3

Gecko Pattern – good pattern, but no Test Bar that closes beyond price activity (Entry: Long GC, 15min)

Gecko4

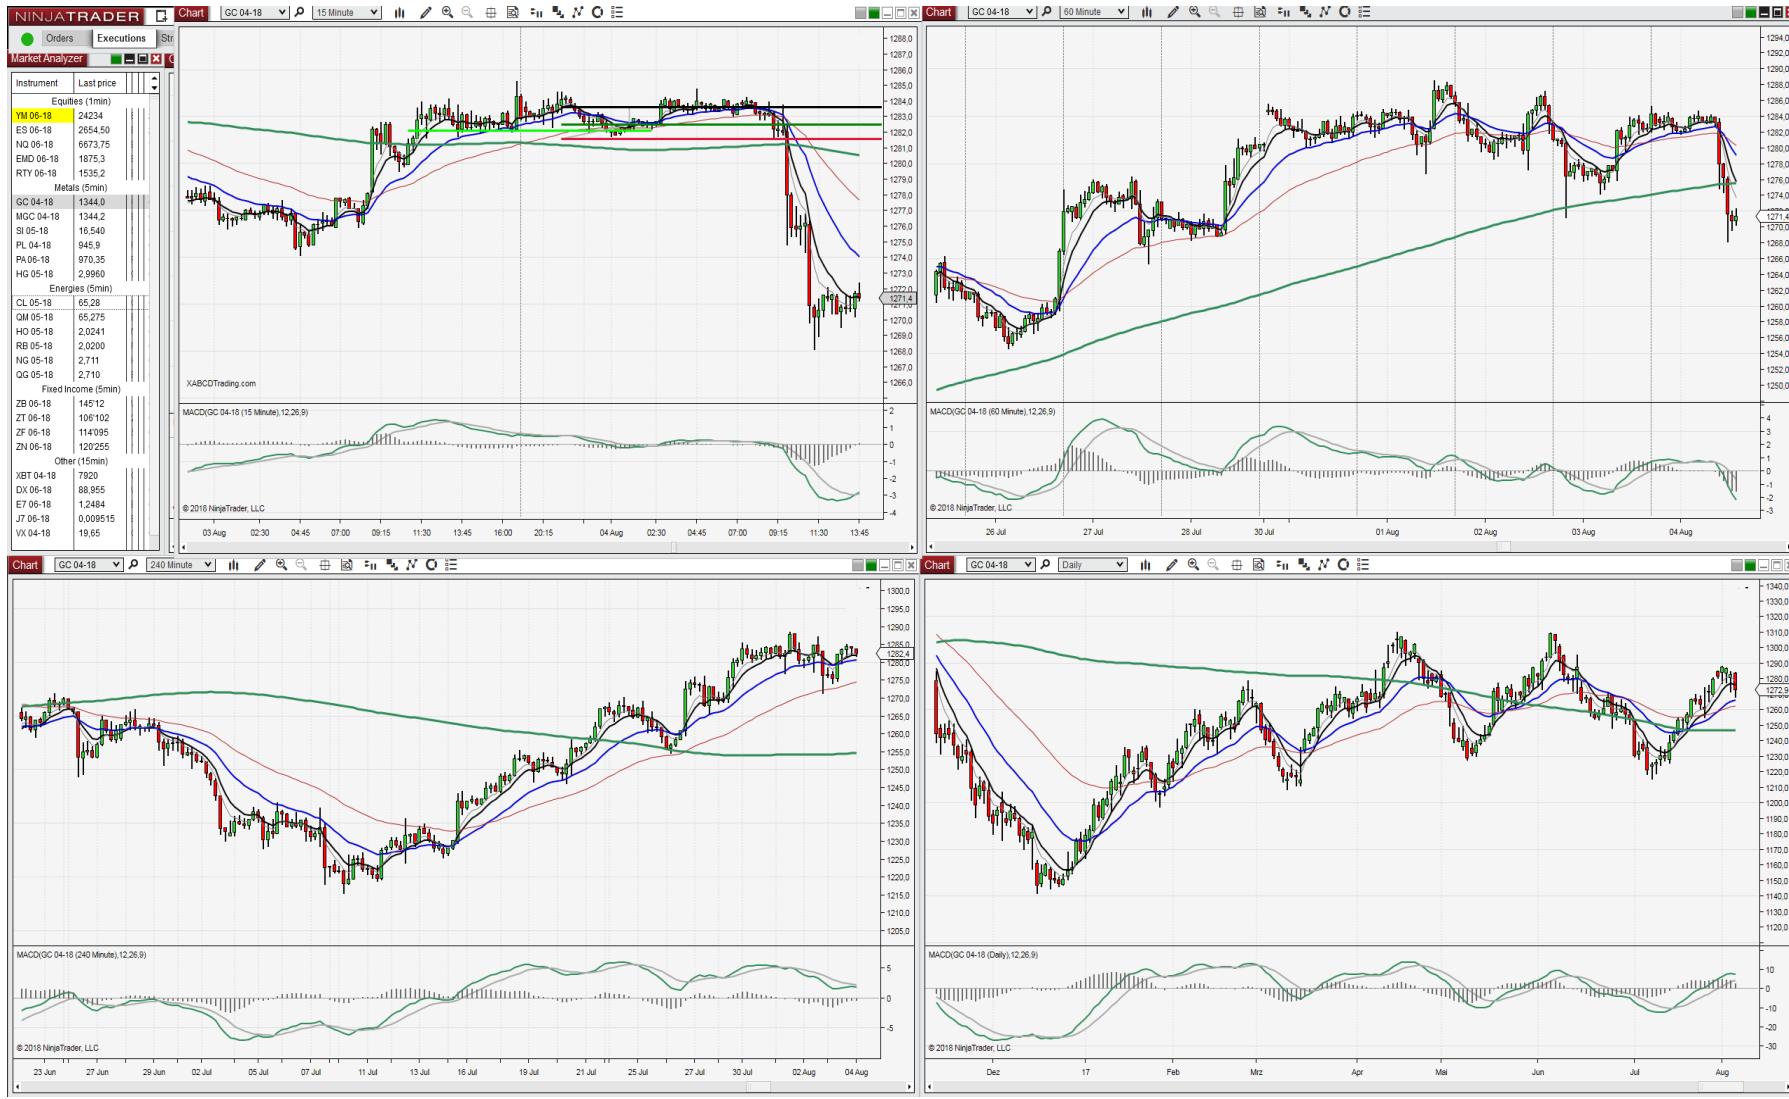

Gecko Setup – HF in good established EMA-trend (Entry: Long GC, 15min)

Gecko4

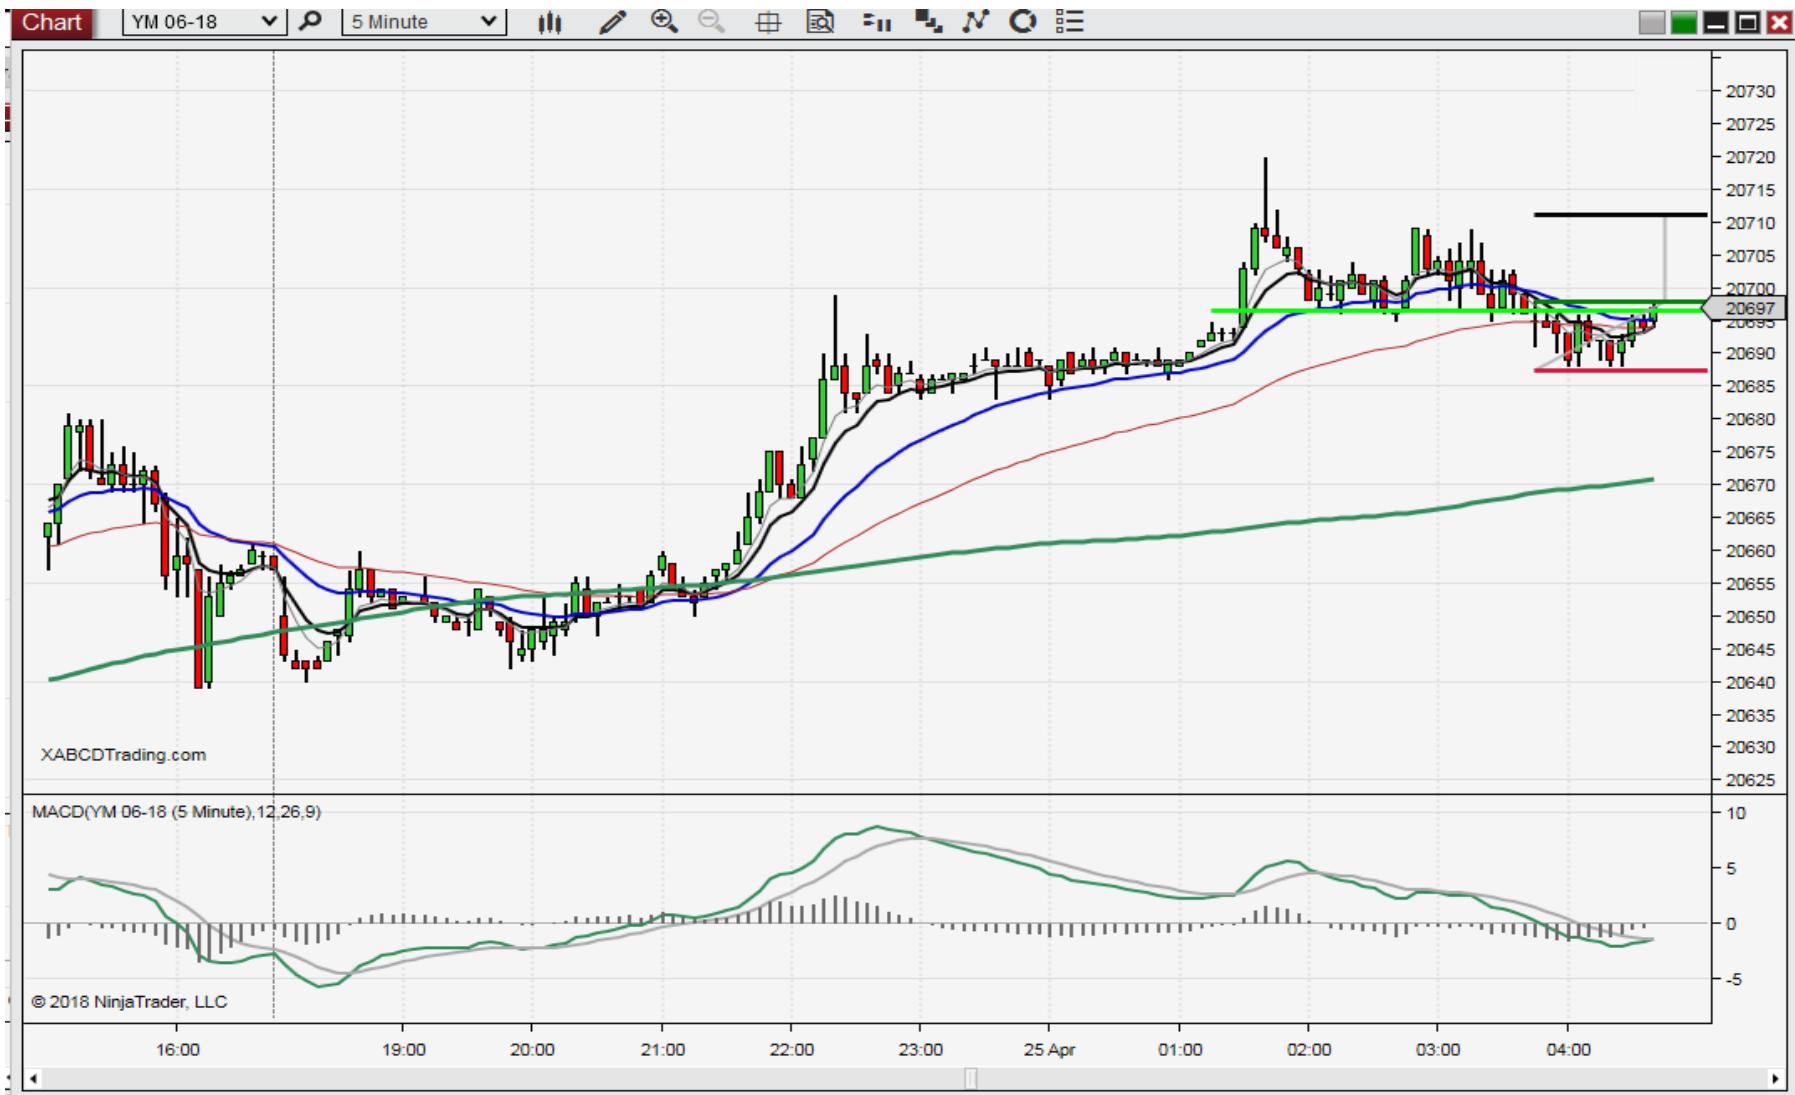

Gecko Development – price not strong enough to run for stops – NO trade. (Entry: Long GC, 15min)

Gecko4

Gecko Pattern – multi-bar breakout building pressure for stop-runs (Entry: Long YM, 5min)

Gecko5

Gecko Setup – while MF & HF in trending mode, 240min with HT stop-run level (Entry: Long YM, 5min)

Gecko5

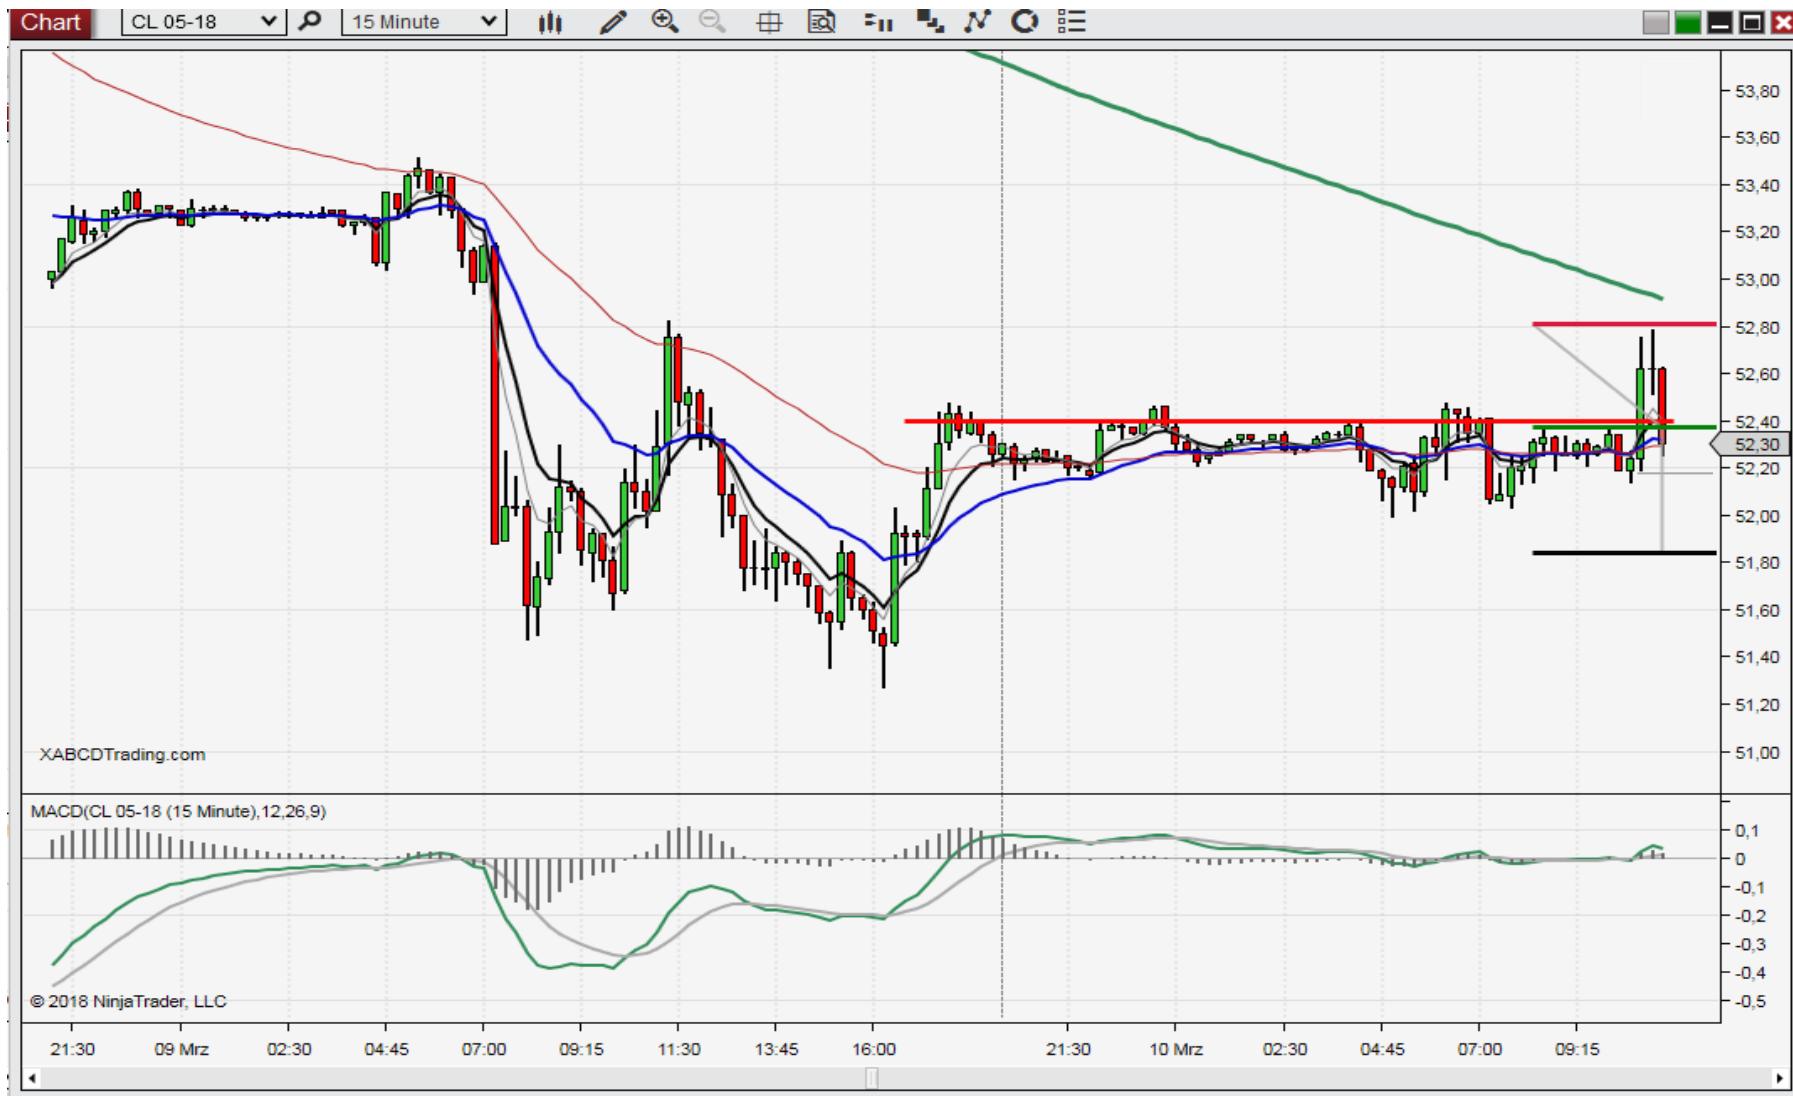

Gecko Development – edges: stop-run above pattern, HT trend, HT stop-run level (Entry: Long YM, 5min)

Gecko5

Gecko Pattern – Strong test bar with a close beyond consolidation prices (Entry: Short CL, 15min)

Gecko6

Gecko Setup – MF in strong trend mode after break out of sideways in HF (240min) (Entry: Short CL, 15min)

Gecko6

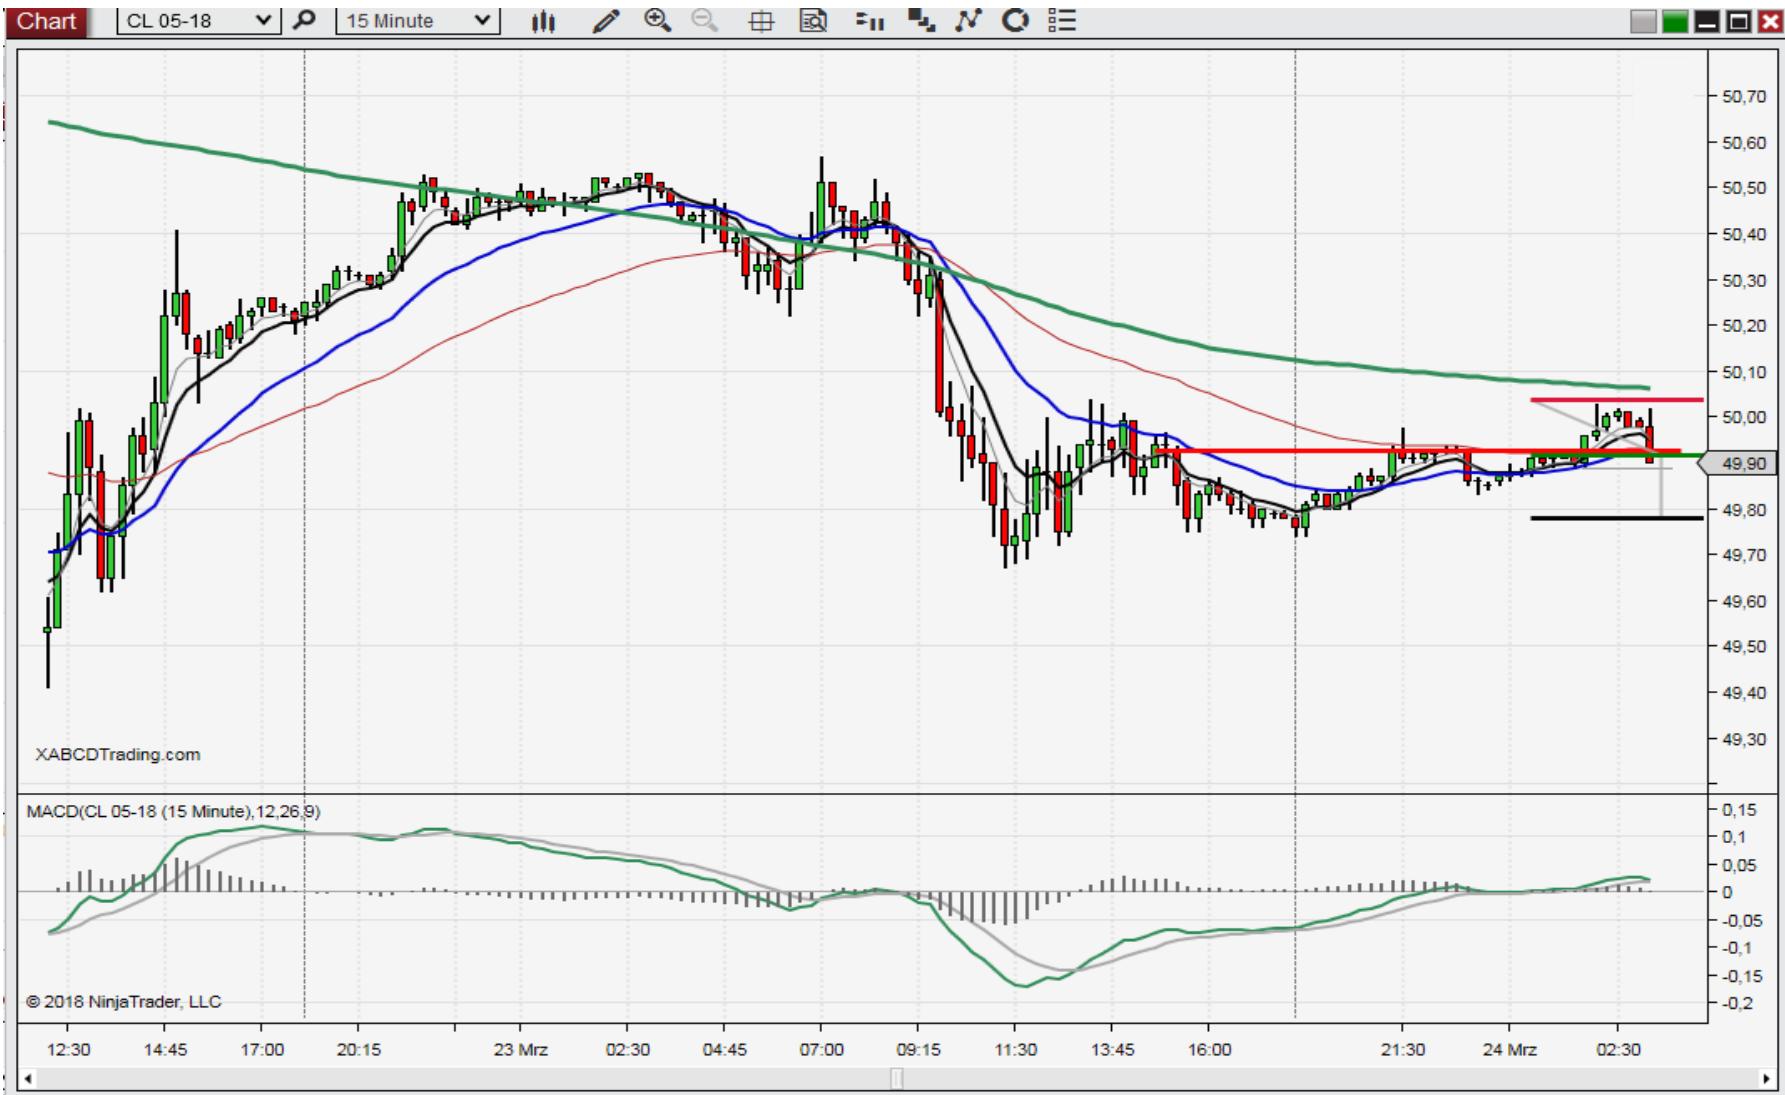

Gecko Development – low-risk entry into the start of a promising HT down-trend (Entry: Short CL, 15min)

Gecko6

Gecko Pattern – good pattern based on a strong MM, several stop-run levels (Entry: Short CL, 15min)

Gecko7

Gecko Setup – HF in EMA-Trend about to accelerate the down-trend (Entry: Short CL, 15min)

Gecko7

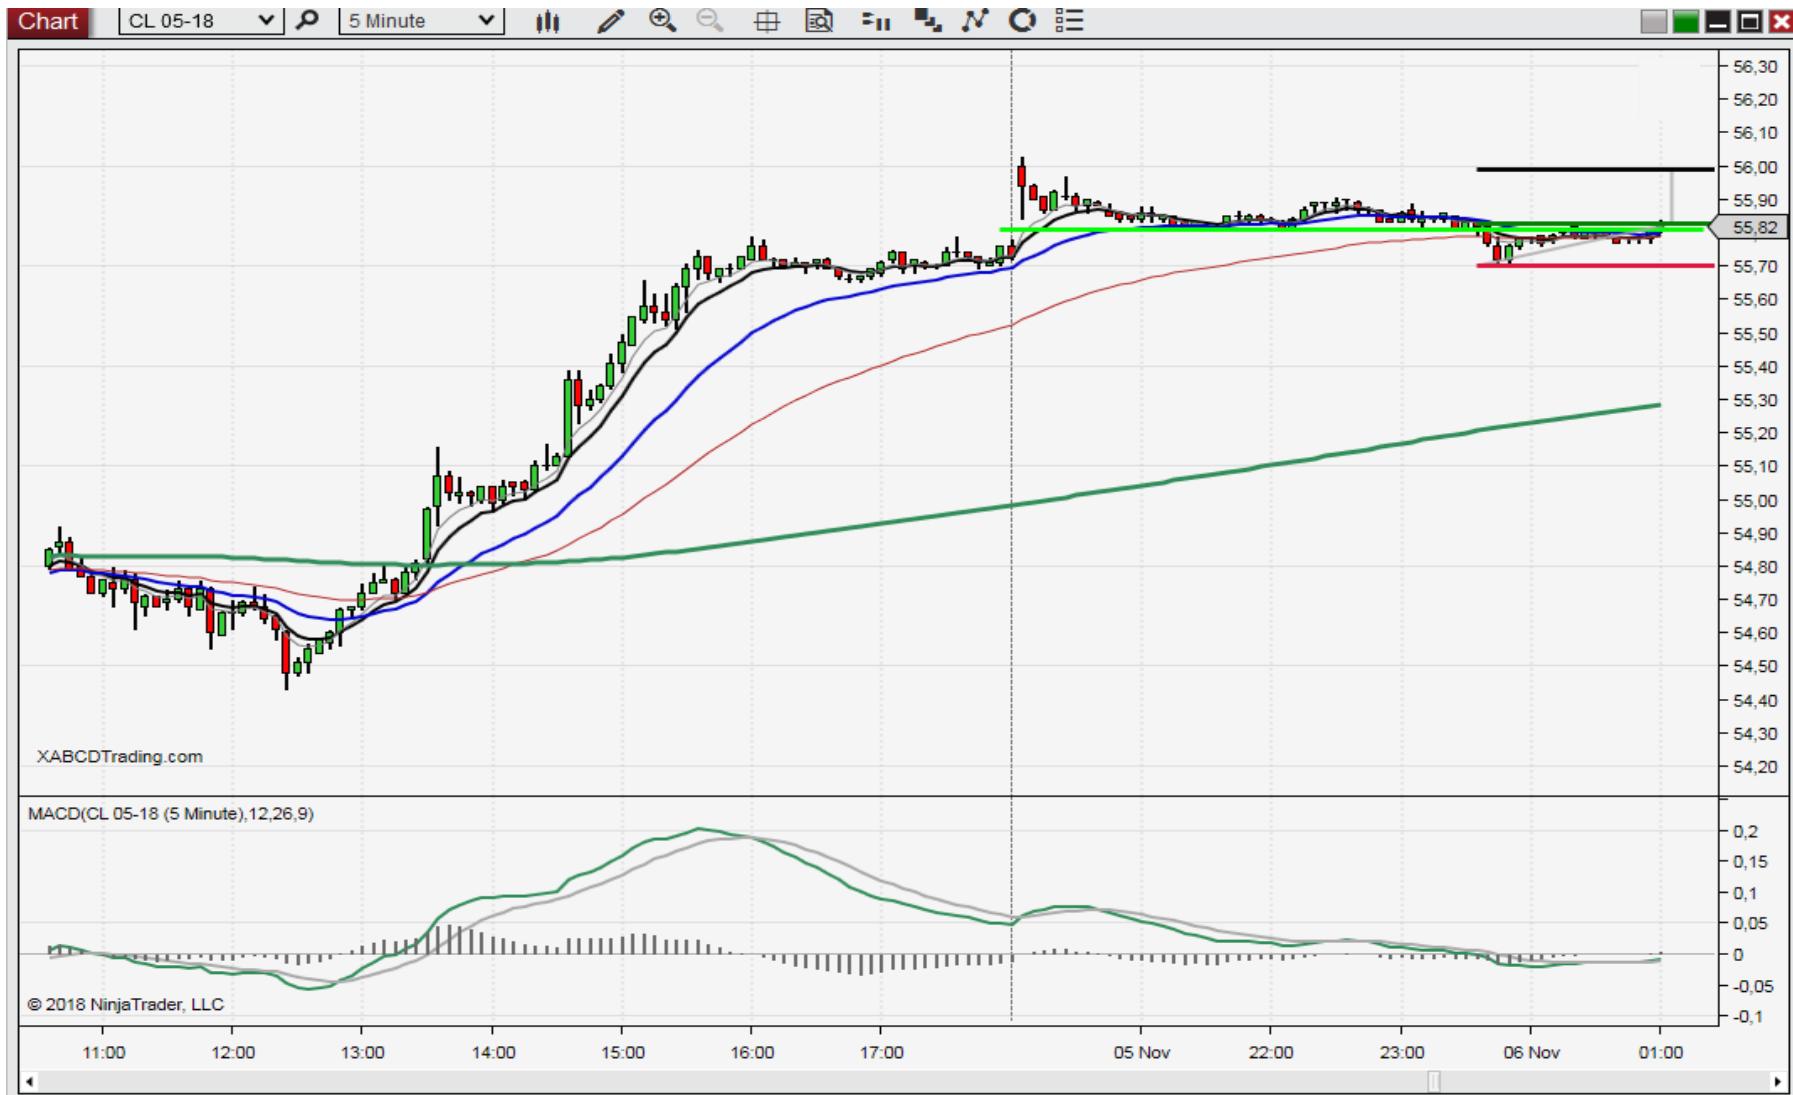

Gecko Development – losses are part of the system / stop-out (Entry: Short CL, 15min)

Gecko7

Gecko Pattern – clear & strong Test Bar that fails (Hook), then re-break of BO level (Entry: Long CL, 5min)

Gecko8

Gecko Setup – clear touch of HT support being 21 (MF) and 5 (HF)

(Entry: Long CL, 5min)

Gecko8

Gecko Development – stop well protected, then stop-run and 20% stop-trail for BE (Entry: Long CL, 5min)

Gecko8

Gecko Pattern – very good & slim pattern with many touches and several stop-runs (Entry: Short GC, 5min)

Gecko9

Gecko Setup – But: HF trend rules (here: EMA-trend) NOT fulfilled, ie no trade (Entry: Short GC, 5min)

Gecko9

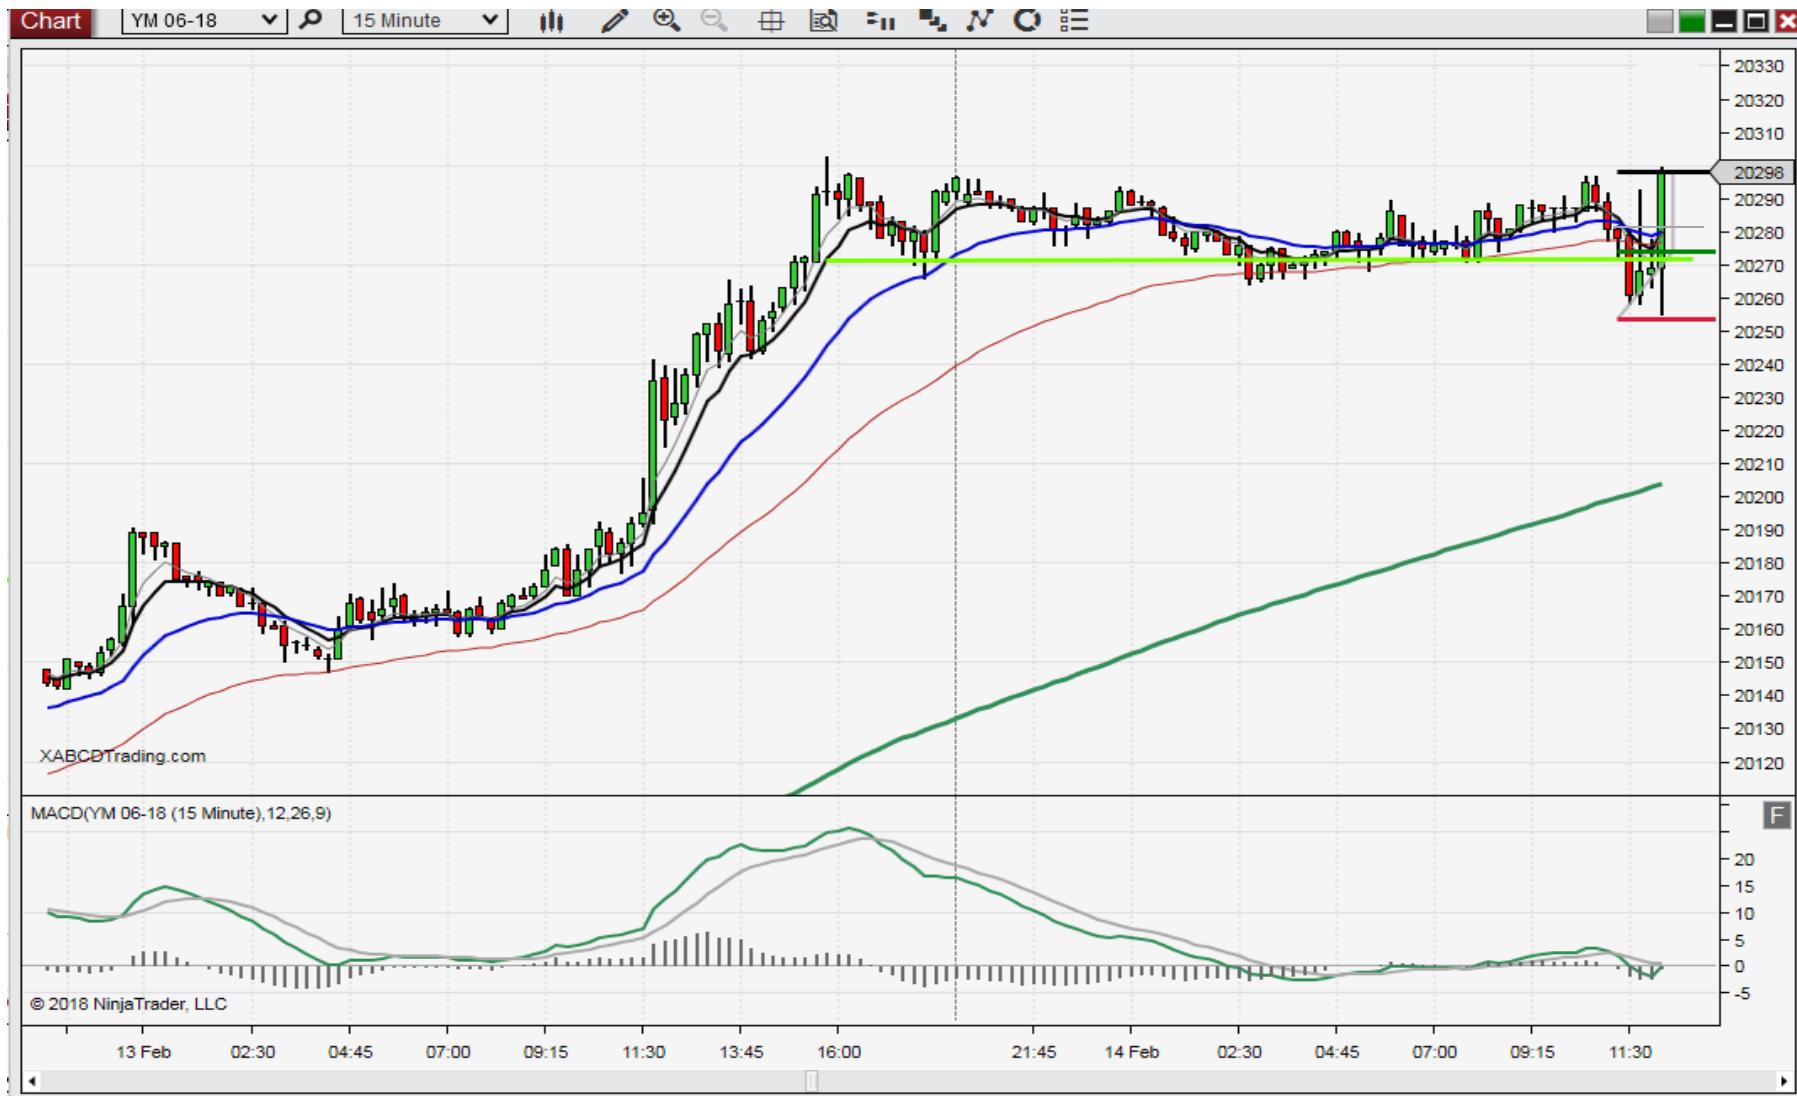

Gecko Development – price not strong enough to initiate a trend resumption (Entry: Short GC, 5min)

Gecko9

Gecko Pattern – slim pattern with a good number of precise touches; re-entry (Entry: Long YM, 15min)

Gecko10

Gecko Setup – good trending charts in all timeframes; edges in favor for R-winner (Entry: Long YM, 15min)

Gecko10

Gecko Development – strong follow through providing a big R winner (Entry: Long YM, 15min)

Gecko10

BONUS

Gecko Pattern – Excitable TB testing the 200 SMA; 4 SRLs ahead (Entry: Long NQ, 5min)

Bonus

Gecko Setup – High quality LF pattern in strong HF & HHF trends; RR ratio >2:1 (Entry: Long NQ, 5min)

Bonus

Gecko Development – clean slingshot move achieving Weekly R-goal (Entry: Long NQ, 5min)

Bonus

Gecko Pattern – Volatility build-up, TB clearing the lows, 1 big STR (Entry: Long RB, 15min)

Bonus

Gecko Setup – Strong test of 21 MF and 8 HF. HHF momentum trade. (Entry: Long RB, 15min)

Bonus

Gecko Development – Stop-run move, then go with the momentum (HHF) (Entry: Long RB, 15min)

Bonus

Gecko Setup – Strong top-run move, all TFs in uptrend (Entry: Long NG, 5min)

Bonus

Gecko Development – Strong top-run move, all TFs in uptrend (Entry: Long NG, 5min)

Bonus

Gecko Pattern – Plain-vanilla S1. Extra-bonus: spile 200 HHF opportunity (Entry: Long RTY, 5min)

Bonus

Gecko Pattern – Plain-vanilla S1. Extra-bonus: spile 200 HHF opportunity (Entry: Long RTY, 5min)

Bonus

Gecko Pattern – Plain-vanilla S1. Extra-bonus: spile 200 HHF opportunity (Entry: Long RTY, 5min)

Bonus

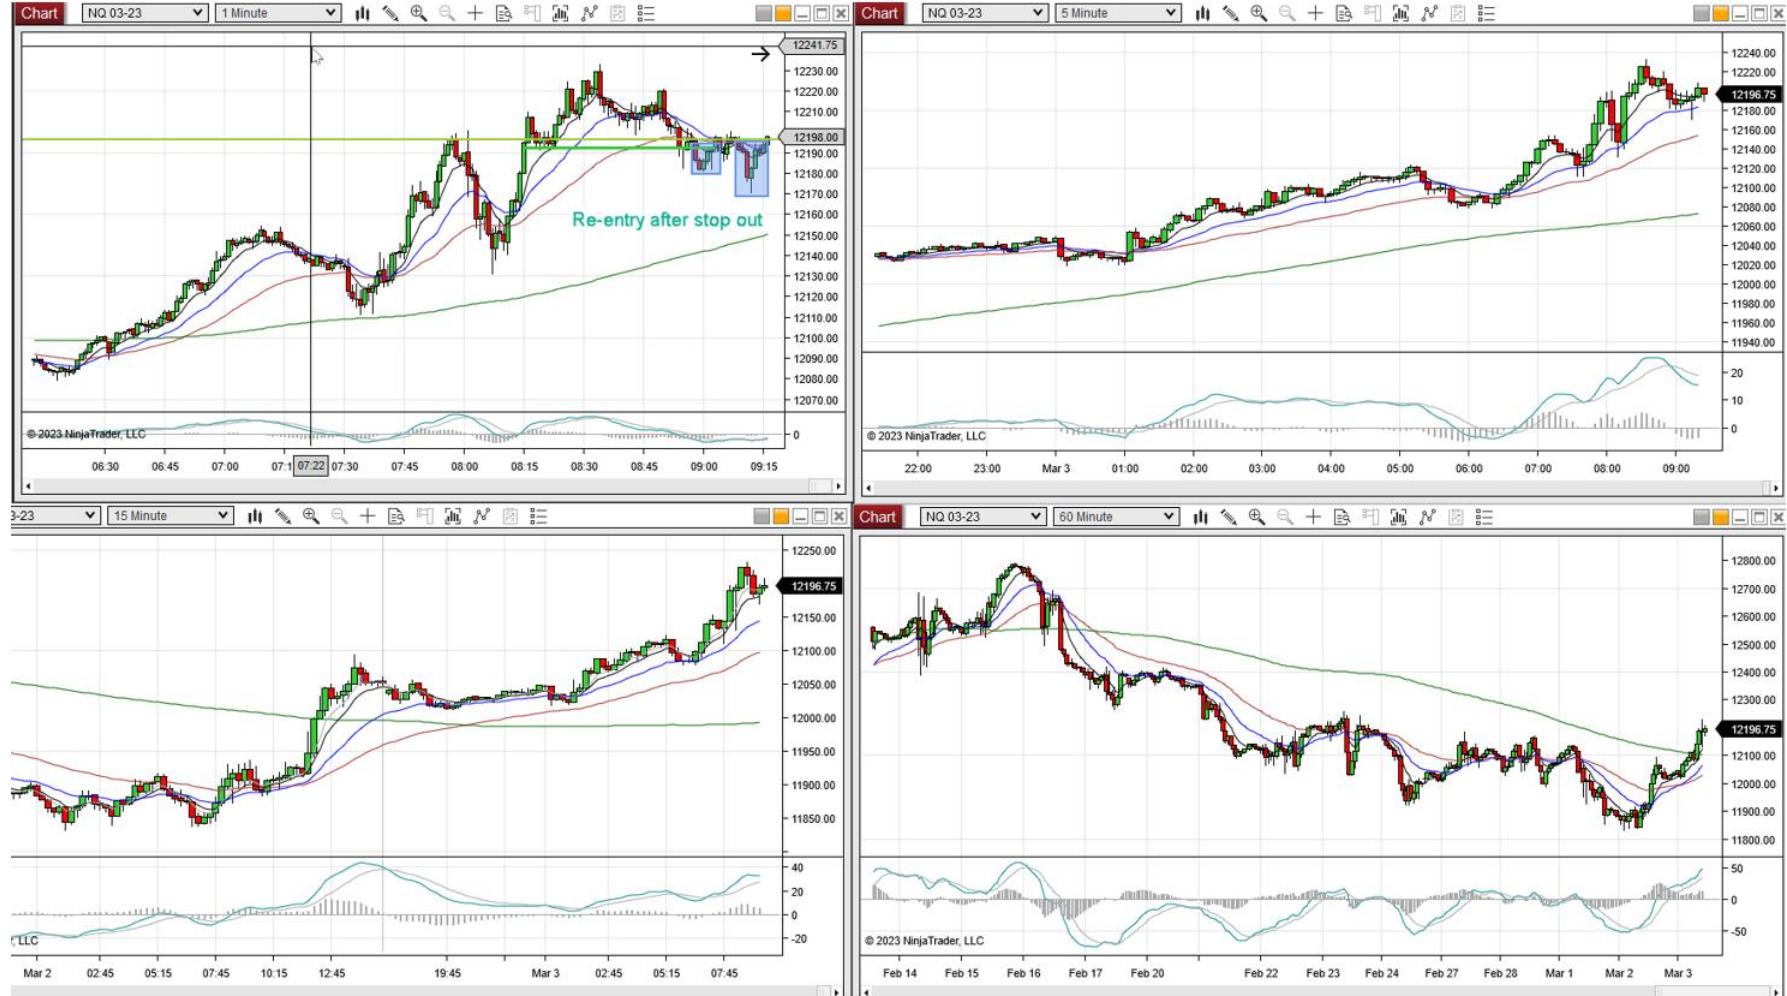

Gecko Pattern – Entry based on a TB, then running for HHF SRLs (Entry: Long NQ, 1min)

Bonus

Gecko Setup – Entry based on a TB, then running for HHF SRLs (Entry: Long YM, 15min)

Bonus

Gecko Development – x (Entry: Long YM, 15min)

Bonus
